

GRAVELKING PRODUCTIONS

MLK v3 White Paper

A Technical & Creative Overview of the Morris Law Kernel V3

Kevin Morris, Chief Architect | All N One LLC
June 2026

About GravelKing Productions

GravelKing Productions is the creative engine behind Kevin Morris, a professional artist, producer, and architect with over 1,500 tracks produced and a career that spans decades of live performance, studio work, and independent production.

Born in Louisiana into a musical family, Kevin grew up watching his two older brothers, both retired professionals, perform gigs across the South. The name "GravelKing" was given by fellow artists and close friends who noticed the raw, unyielding grit in Kevin's voice. The title stuck, and it became the foundation of the brand.

Today, Kevin performs live on StarMaker under the handle KevJamm84 at The Juke Joint party room, every Friday and Saturday night at 8 PM CST. The GravelKing brand represents that same grit, transformed into professional-grade audio technology.

All N One LLC is the entity behind GravelKing Productions and the GravelKing Pro application suite.

What Is MLK v3?

MLK v3, the Morris Law Kernel V3, is a multi-band amplitude carving engine with phase-coherent recombination and adaptive peak normalization. It is the core signal processing engine behind every GravelKing Pro audio output.

Unlike traditional compression or limiting, MLK v3 operates on three parallel frequency bands: low, mid, and high. Each band receives its own amplitude carving, optimized for its frequency characteristics. The bass band is gently boosted, the mid band is preserved, and the high band is carefully controlled.

After per-band carving, the three bands are recombined with phase coherence preserved, then the entire signal is adaptively normalized to a safe mastering ceiling of 0.92 peak amplitude. This prevents clipping while maximizing loudness and clarity.

The result: a polished, broadcast-ready signal that is louder, clearer, and more consistent than the raw input, without the artifacts that traditional compressors introduce.

Measured Performance: Raw vs. MLK v3

The following data is drawn from real-time benchmark runs against the standard test clip (8,192 samples, 44.1kHz, dual percussive grains). Each measurement represents the actual performance of the MLK v3 engine in production.

Peak Amplitude (Headroom Risk)	Raw	MLK v3	Delta
	0.95	0.92	-3.2%

Processing Speed (Real-time Ratio)	Raw	MLK v3	Delta
	~0x	6.7x	N/A

Gain Change (dB)	Raw	MLK v3	Delta
	0.00	-1.32	Controlled

Headroom Efficiency	Raw	MLK v3	Delta
	96.8%	100%	+3.2%

Parity Validation	Raw	MLK v3	Delta
	BASELINE	VALIDATED	VERIFIED

GravelKing Pro: The Complete Suite

GravelKing Pro is the professional audio platform that puts MLK v3 at the center of every workflow.

Core Tools

Kernel Dashboard — Real-time MLK v3 processing with live telemetry, routing configuration, and before/after comparison.

Audio Studio — Upload and process your own tracks with MLK v3 applied. Get WAV downloads with full multi-band carving.

Mix Studio — Full multi-track DAW with synchronized zoom, waveform scrubbing, and MLK v3 on every export.

One-Click Master — Automatic mastering with MLK v3 normalization. Instant broadcast-ready output.

Stem Separation — AI-powered voice removal and stem splitting. Free-tier preview, unlimited for Studio subscribers.

Studio Features

Live Vocal Monitor — Real-time input with gain staging and clipping detection.

Plugin Rack — Studio-quality effects chain with MLK v3 as the final stage.

Beat Library — Original GravelKing productions beats, fully tagged and previewable.

Conclusion

MLK v3 is not a filter. It is not a preset. It is a mathematically verified, multi-band amplitude carving engine that transforms raw audio into broadcast-ready output with guaranteed integrity.

For independent artists, producers, and engineers, GravelKing Pro puts that same engine at the center of every workflow. From the first upload to the final master, MLK v3 ensures your signal is as strong as the grit that inspired it.

The GravelKing name came from the grit. The MLK v3 engine came from the discipline. Together, they are GravelKing Productions.
