

# LinkedIn Outreach Playbook

---

Morris Law Kernel v3.5 + IP Protection System · Kevin Morris · July 2026

## How to Use This Document

1. Search the names/roles below on LinkedIn.
2. Verify they are still in relevant positions.
3. Use the copy-paste message templates (customize slightly for warmth).

---

## Recommended Search Terms (Run These on LinkedIn)

### DAW & Audio Software Companies

- "Head of Audio" OR "DSP Engineer" OR "Audio Engine" at Ableton
- "Director of Engineering" at Bitwig
- "CTO" OR "Head of Technology" at FL Studio / Image-Line
- "Audio DSP" at Native Instruments, iZotope, Waves, FabFilter, Plugin Alliance

### Music Tech & Rights Companies

- Founders/CEOs of companies like:
  - SoundBetter, Splice, LANDR, Ditto Music, CD Baby, TuneCore, Songtrust, Music Gateway
- "Head of Rights" OR "Technology" OR "IP" at music libraries (e.g., Epidemic Sound, Artlist, Musicbed, AudioJungle)

### Creator Economy & Investor Targets

- Investors who have invested in music tech or creator tools (search "music tech" + "investor" or specific funds)
- Founders who previously worked at major audio companies and are now building new tools

## Specific High-Value Profiles to Search (Examples as of 2026)

### Strong Targets (Search these exact or similar names):

1. **People at Ableton** — Search "Ableton" + "DSP" or "Audio Engine"
2. **People at Bitwig** — Search "Bitwig" + "Engineering"
3. **Founders/CEOs** of smaller but growing music tech tools
4. **IP/Technology leads** at sync libraries and music supervision companies
5. **Investors** who have backed audio or creator platforms (search "music tech investor" or specific funds like "Creator Ventures", "Sound Ventures", etc.)

### Pro Tip: Use LinkedIn Sales Navigator filters if available:

- Current company = music tech / audio software
- Title keywords = Founder, CEO, CTO, Head of Product, DSP, Audio Engineer
- Posted about audio, music tech, or creator tools recently

## Copy-Paste Message Templates

### Template 1: Value-First Cold Message

Hi [First Name],

I'm building something that combines high-performance adaptive audio mastering with cryptographically verifiable human authorship and ownership.

It uses Numba-accelerated DSP, robust watermarking that survives re-encoding, and multi-layer cryptographic provenance that can be used as legal evidence.

Would you be open to a quick 10-minute call to see a short demo? I'm selectively reaching out to people working on audio tools and creator infrastructure.

Best,  
Kevin Morris  
Founder, GravelKing Productions  
@GravelKing84

### Template 2: For Someone Who Engaged With Your Content

Hi [First Name],

Saw your post about [mention specific thing they posted]. Really interesting.

I'm working on a system that pairs serious adaptive mastering performance with court-grade proof of human authorship and ownership (cryptographic provenance + robust watermarking).

Thought it might be relevant to what you're building. Happy to share a quick demo if you're interested.

Cheers,  
Kevin

### Template 3: Licensing / Partnership Angle

Hi [First Name],

I noticed [Company Name] is doing interesting work in [their space].

We've built Morris Law Kernel v3.5 – a production-ready adaptive mastering engine with built-in court-grade IP protection (cryptographic signing, perceptual hashing, and verification API).

It could be a strong differentiator for platforms that want to offer both superior sound quality and real ownership tools to creators.

Would you be open to seeing a short technical overview?

Best regards,  
Kevin Morris  
GravelKing Productions

## Recommended Daily Outreach Volume (Bootstrapped)

- **Week 1:** 15–25 personalized messages per day
- **Week 2+:** 10–15 high-quality messages per day + follow-ups

Track replies in a simple spreadsheet (Name | Company | Date Messaged | Reply? | Next Step).

**This outreach system is designed to create warm conversations with decision-makers who can lead to licensing, partnerships, or acquisition interest.**
