

GravelKing Pro

GravelKing Pro — Bootstrapped Customer Acquisition Workflow

The operating plan for getting paying customers with near-zero ad spend. Owner: founder + Nina. Loop length: 14 days, repeating.

0. The One-Sentence Strategy

Show the write → record → master → certify flow on video, every day, where songwriters already gather — and let the certificate be the reason they pay.

1. Assets We Already Have

- 59-second vertical promo video (JAX → Vocal Booth → Foundry → certificate) — TikTok/Reels/Shorts ready.
- Live product at gravelkingpro.it.com with free tier (JAX writing + Vocal Booth recording).
- \$1.99 certificate impulse unlock — the lowest-friction paid moment in music software.
- Referral program: commission paid only on verified paid invoices.

2. The Funnel

Short video / post → Free JAX session (no card) → Artist writes lyrics
→ "Compose" + "Master" are Pro moments → Song finished (emotional peak)
→ Certificate offered (\$1.99 or King) → Paid conversion
→ Artist shares certificate → k-factor loop

Every stage has exactly one job. Never ask for money before the artist has lyrics they love.

3. Weekly Operating Rhythm (repeatable, ~1 hr/day)

Day	Action	Time
Mon	Post TikTok + Reel + Short (demo clip or screen capture). Reply to every comment.	45 min
Tue	Reddit: one genuine value post or detailed answer in r/Songwriting, r/WeAreTheMusicMakers,	30 min

Day	Action	Time
	r/indieheads (no link-dropping; profile has the link).	
Wed	Facebook groups (independent artists, home recording, songwriting): share a finished-song certificate image + story.	30 min
Thu	TikTok #2: duet/stitch a songwriting-struggle video, show the fix in GravelKing.	45 min
Fri	Post a “certificate reveal” — the most shareable asset we own.	20 min
Sat	Review analytics (which post drove signups?), double down on the winner’s format.	30 min
Sun	Rest / batch-record next week’s clips.	—

4. Content Rules (what actually converts)

1. **Show, never tell.** Screen recording of a real song going from prompt to certificate. Captions on, hook in first 2 seconds (“This songwriter can prove every word is his.”).
2. **Lead with the wound.** “POV: someone claims your song” beats “check out our features.”
3. **One CTA only:** “Write your first verse free — link in bio.”
4. **Reply to every comment for the first 90 days.** The comment section is the sales floor.
5. **Certificate reveals are the hero format.** A court-ready PDF for a bedroom song is inherently surprising — it is the ad.

5. Platform Notes

- **TikTok/Reels/Shorts:** volume game — 4-5 posts/week, vertical, native captions, trending audio only when it fits.
- **Reddit:** credibility game — never lead with the link; answer songwriting questions thoroughly, mention the tool only when it’s genuinely the answer. One spammy post can burn the account.
- **Facebook groups:** community game — join 10 indie-artist groups, be helpful for a week before the first product mention.

6. Referral Loop (month 2+)

- Every certificate PDF carries “Certified on GravelKing Pro” — the document is the referral.

- Creators with audiences get the referral link; commission paid only on verified paid invoices (anti-fraud already built).
- Target: 5 micro-influencers (1K–50K followers in songwriting niches) by day 60.

7. Measurement (weekly, 15 minutes)

Metric	Source	Target by day 90
Signups/week	app analytics	150
Free→paid conversion	Stripe/Play	4%
Certificate attach rate	certs issued / songs finished	30%
Cost per paying customer spend / new subs		< \$15
Payback period	CAC / contribution margin	< 2 months

8. When to Spend Money

Only boost a post that has **already proven itself organically** (top 10% by watch-through). \$5/day for 3 days against lookalike songwriter interests. Kill anything that doesn't produce signups under \$15 each. Never advertise a feature — advertise the finished song and its certificate.

9. The 14-Day Content Pack

Document 05 contains 14 days of ready-to-post copy for Facebook, TikTok, and Reddit — each post with an image-generation prompt for Gemini. That pack is Week 1–2 of this workflow; regenerate a fresh pack every two weeks from the winning formats.
